(54) Title: FOLDABLE WHEELBARROW AND HAND CART

(57) Abstract: This invention relates to a foldable wheelbarrow and a foldable hand cart. Both comprise a wheel mounting assembly, a leg assembly rotatably connected to the wheel mounting assembly, one or more wheels rotatably connected to the wheel mounting assembly, a collapsible container connected to the wheel mounting and leg assemblies, and at least one support member rotatably connected to both the wheel mounting and leg assemblies and serving to maintain the wheelbarrow in an erected position. The handle members have a pair of handles and a kicker; the kicker has a pair of interconnected longitudinally-extending portions that are each rotatably connected to an associated rear handle segment thereby enabling the handle members to rotate between erected and folded position.
